

presto Rust Converter

Technical Information

presto stop Rust Converter is a rust converter and primer in one work step.

This rust restoration system merges with the neutralized rust layer to a metallic-organic iron complex. As primer on surfaces infested with rust it forms the basis for a durable lacquer finish.

Excellently suitable for the restoration of vehicles, machines and all kinds of facilities.

Ord.-no: 603079, 603086

Quality & properties

- Anti-corrosive, reliable rust protection and rust converter
- Rust emerges into a water-insoluble, black, anorganic iron complex
- Easy to apply
- Can be coated with all air-drying paints and aerosol paints
- Free of heavy metals and mineral acids
- Air-drying
- Very good solvent-resistance
- Can be mixed with water

Physical & chemical data

- Base: Special combi resin
- Colourname: beige
- Minimum Working Temperature: 10 °C
- Maximum Working Temperature: 30 °C
- pH value: 2,2
- Flash point: n.a.
- Storage stability: 5 years
- Content:
 - 100 ML
 - 250 ML

How to use

Remove rust, fat, dirt as well as paint flakes which are infiltrated by corrosion; use a brush if necessary.
 Before use, shake the bottle well.
 Apply 2 - 3 layers, depending on degree of corrosion.
 Coatable after approx. 6 - 8 hours, depending on ambient temperature.

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labelling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.

As of January 26, 2026 – This release replaces all eventually earlier issued versions.
